Custom Mission Critical Applications

Hittite Microwave has a strong reputation for technically innovative, high performance, quality products and provides a wide variety of custom solutions for military and space environments.

- DC - 110 GHz Solutions
- ICs to Instrumentation
- MIL-PRF-38534 / 38535 & MIL-STD-883 Compliant
- ISO 9001:2000 QMS
- AS9100 B Certified

Since 1985, Hittite Microwave has offered standard and custom MMIC die, hermetic packaged die, MIC hybrids, subsystems and instrumentation for analog, digital and mixed-signal IC military and space applications. We leverage our IC design capabilities to select the optimum device technologies for these applications. We employ internal resources for engineering, prototyping and production assembly / test. High reliability screening is offered for all products to customer specifications and / or requirements outlined in MIL-PRF-38534/38535.

Every product we design, manufacture and ship is backed by our commitment to total quality. We provide our customers with products that meet or exceed all requirements and function reliably throughout their specified life.

Contact us Today to Discuss Your Mission Critical MMIC, MIC, Subsystem and Instrumentation Hi-Rel Product Requirements.

Military Level Component & Module Qualification Commercial / Industrial Components & Assemblies

Hittite Microwave offers MIL-PRF-38534 Class H & MIL-PRF-38535 Class B screening on die, hermetic, packaged die and hybrid assemblies.

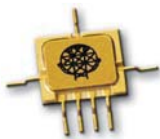

High Reliability Screening & Tests

- **Wafer Lot Acceptance Test (WLAT)**
 Bond Pull & Die Shear Test
 SEM Inspection
 Metal & Glass Thicknesses
- **Temp Cycle Stress Test**
- **Constant Acceleration Stress Test**
- **High Temp Burn-In Test**
- **Visual Inspection**
- **Vibration Stress Test**
- **Fine & Gross Hermeticity Test**
- **Radiographic Inspection**
- **Particle Impact Noise Detection**
- **Residual Gas Analysis**
- **ESD Characterization**
- **Serialized Test Data**
- **Qualification Report**

Space Level Component & Module Qualification

Hittite Microwave offers MIL-PRF-38534 Class K & MIL-PRF-38535 Class S screening on die, hermetic, packaged die and hybrid assemblies.

Hermetic
SMT Package

Hermetic Modules

FET Channel SEM

Hittite is a major component supplier to hundreds of military radar, ECM/EW, data link and communications programs worldwide.

Hittite is qualified by major spacecraft OEMs worldwide, shipping tens of thousands of Space grade components which are currently operational on dozens of commercial, scientific & military spacecraft.

Hittite Vertically Integrates ICs, Modules & Subsystems to Achieve

Microwave Integrated Circuits (MIC)

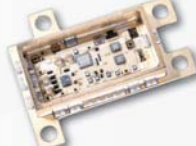

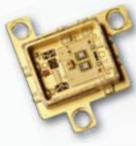

• Local Oscillator

• Downconverter

- Class K Space MICs

- Class B Military MICs

Standard & Custom Connectorized Modules

• Dielectric Resonator Oscillator

• Hermetic MicroSynth™ Oscillator

• Ultra Low Phase Noise Amplifiers

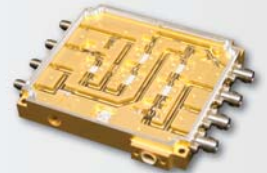

• SP4T Switch

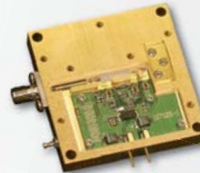

Multi-Function Modules

• Ka-Band T/R Module

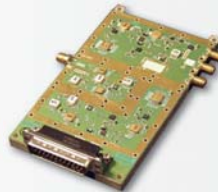

• Millimeterwave Receiver

• x8 Active Multiplier

• Wideband Jitter Generator

• Radar Synthesizer

• SATCOM Synthesizer

• Millimeterwave Receiver

Ceramic Hermetic SMT to 40 GHz

COTS Ceramic SMT to 43 GHz

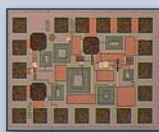

GaAs MESFET

EID MESFET

- Space Qualified
- Circuits to 40 GHz

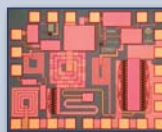

GaAs pHEMT

0.25, 0.15, 0.10 μ m pHEMT
0.5 μ m EID pHEMT

- Space Qualified
- Circuits to 110 GHz

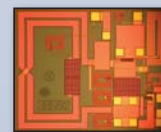

InGaP HBT Analog

Power Process

- Space Qualified
- Circuits to 24 GHz

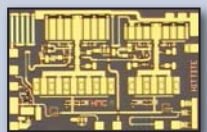

InGaP HBT Digital

Analog / Digital Integration

- Space Qualified
- Circuits to 38 GHz

GaN HEMT

High Efficiency Amps & Control Devices

- Space Qualified
- Circuits to 40 GHz

Hittite has Created an Exemplary Foundation of Advanced

Performance Commensurate with Customer Requirements

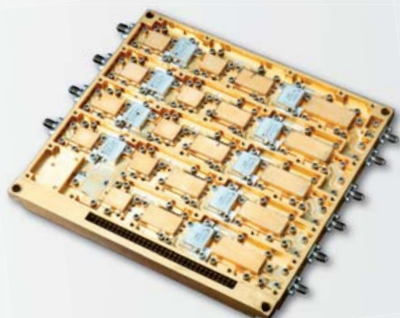

Integrated Subsystems

- High Performance Wideband Synthesizer

- Microwave Synthesizer

- Mutli-Channel Receiver

Instrumentation

- HMC-T2100B - 20 GHz
Portable, Battery Operated
Synthesized Signal Generator

- HMC-T2100 - 20 GHz
Synthesized Signal Generator

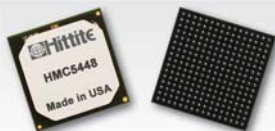

- 8 GHz Rack-Mount Dual
Synthesized Signal Generator

Subsystem Design & Manufacturing Expertise

Hittite has extensive experience in design & manufacture of high-performance miniature microwave subsystems for demanding high-reliability military and space applications. Hittite applies expertise in system analysis, MMIC & module design, mechanical packaging, automated manufacturing, RF test, screening and qualification. Since the majority of MMIC chips are Hittite products there are significant benefits in controlling performance, schedule, screening, qualification, packaging, part obsolescence, troubleshooting and design optimization.

High Speed BGAs

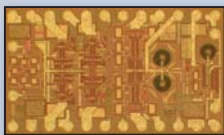

COTS Plastic SMT to 40 GHz *

* Select products are available with 80/20 SnPb lead finish

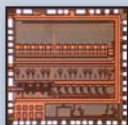

SiGe HBT

Analog / Digital Integration

- Linear Amplifiers
- Circuits to 20 GHz

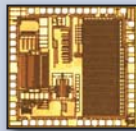

SiGe BiCMOS

120, 180, 350 nm
Analog / Digital

- Large Scale Integration
- Circuits to 80 GHz

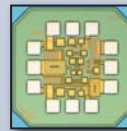

SILICON CMOS

45 to 180 nm
Analog / Digital

- Large Scale Integration
- Circuits to 40 GHz

SOI

Silicon-on-Insulator

- Linear Control Devices
- Wideband Circuits to 8 GHz

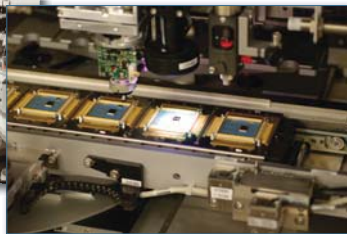

Semiconductor Technologies for Analog/Digital Applications

Custom Integrated Circuits

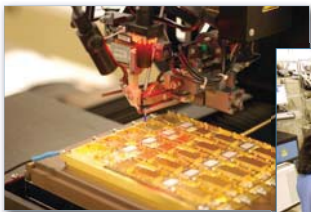

- Semiconductor device to system level knowledge.
- Extensive library of proven Analog, Digital & Mixed-Signal ICs and MMICs.
- Mechanical and thermal design.
- Validated device models.
- Specialty products include: Synthesizers, Radar Based Sensors, Tx / Rx Subsystems.

Class 100K Clean Rooms

**Automated Assembly:
Substrate & Die Attach**

**Automated Assembly:
Wirebonding**

High Volume Test Capacity

Facilities, Manufacturing & Test

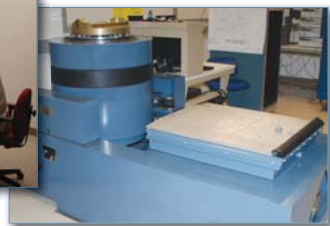

- ISO 9001:2000 and AS9100 B Certified.
- Class 100 environment for S-level product.
- Automatic hybrid assembly equipment includes; die inspect/pick, die/substrate attach, and wire bond.
- IR Reflow equipment for PCB based assemblies.
- Automated digital product test to 40 Gbps.
- Automated RF, microwave and millimeterwave product test to 86 GHz.
- Semi-automated test to 110 GHz.

Quality Assurance; Reliability & Screening

- Complete environmental test lab.
- In-house process qualification, reliability analysis & production screening.
- In-house inspection & test of incoming material.
- Periodic qualification & monitoring of ISO 9001 sub-contractors.
- Full product traceability.

SEM / Physical Analysis

Vibration Test Stand

Module Burn-In

**Automated Wafer Inspect
& Handler**

MILITARY & SPACE CUSTOM SOLUTIONS TO 110 GHz

What We Do

Hittite Microwave is an innovative designer and manufacturer of analog, digital and mixed-signal ICs, Modules, Subsystems and Instrumentation for analog, digital, RF, microwave and millimeterwave applications covering DC to 110 GHz. Our products are developed using state-of-the-art GaAs, GaN, InGaP/GaAs, InP, SOI, SiGe, CMOS and BiCMOS semiconductor processes utilizing MESFET, HEMT, pHEMT, mHEMT, HBT and PIN devices.

We design and supply custom ICs, Modules, Subsystems and Instrumentation, combining multiple functions for specific requirements. We select the most appropriate semiconductor and package technologies, uniquely balancing digital and analog integration techniques.

Hittite Microwave is ISO 9001:2000 and AS9100 B certified. Every component is backed by every Hittite employee and subcontractor's commitment to total quality, thus providing our customers with products that meet or exceed all requirements, are delivered on-time and function reliably throughout their useful life.

Offering over 825 standard products across 27 product lines

<i>Amplifiers</i>	<i>Mixers</i>
<i>Attenuators</i>	<i>Mods. & Demodulators</i>
<i>Broadband Time Delays</i>	<i>Passives</i>
<i>Comparators</i>	<i>Phase Shifters</i>
<i>Data Converters</i>	<i>PLLs</i>
<i>DC Power Conditioning</i>	<i>PLLs with Integrated VCOs</i>
<i>DC Power Management</i>	<i>Power Detectors</i>
<i>DROs</i>	<i>Sensors</i>
<i>Filters - Tunable</i>	<i>Signal Generators</i>
<i>Freq. Dividers & Detectors</i>	<i>Switches</i>
<i>Freq. Multipliers</i>	<i>Transimpedance Amplifiers</i>
<i>High Speed Digital Logic</i>	<i>VGAs</i>
<i>Limiting Amplifiers</i>	<i>VCOs & PLOs</i>
<i>Interface</i>
